**DETAILED ACTION**

***Allowable Subject Matter***

Claims 1-13, 23-31, 38, 40 and 41 are allowed.

The following is an examiner's statement of reasons for allowance: Newly cited reference to Freeman, US Patent 4,207,442, discloses a driver circuit for an electrostatic transducer comprising transformer 21 having secondary windings, diodes 26 and 28, and stators 10 and 11 of the loudspeaker. Freeman does not disclose nor suggest a center tap in the secondary winding whereby the bias return is connected to the center tap, as required by claims 1 and 25. Regarding independent claim 23, Freeman does not disclose at least two secondary connection taps coupled to an alternating current voltage limiting unit. Claim 38 requires two diaphragms connected to two secondary connection taps, which is not disclosed nor suggested in the prior art of record. The power supply circuitry of claim 40, specifically the use of a charging signal separate from the audio signal is also not disclosed in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian T. Pendleton whose telephone number is (571) 272-7527. The examiner can normally be reached on M-F 7-4:30.

Art Unit: 2644
